

This company is one of the most advanced roof truss and wall panel manufacturing operations in Colorado ... one of the only manufacturers to store all loose lumber indoors for higher quality control. Associates will join an organization that prides itself on higher quality product in a factory controlled environment, uses all material in the most optimal way to control waste, and completes projects in about half of the amount of time it takes to build a stick framed project. If you're looking for a long term career in manufacturing with opportunity for advancement, this is it!

We are specifically looking for long-term career-minded employees ready for a true growth opportunity in the field of manufacturing, production or construction. This is a temp to hire general labor position. Bilingual candidates are encouraged to apply.
