

## Materials Testing Technician

Geocal is an established engineering consulting firm with a solid history, good people, and lots of work. We are looking for employees who share our values – to deliver superior quality services, to meet or exceed expectations on every project, and to maintain our clients' trust and satisfaction. **We are serving projects in all five regions of CDOT and municipalities across Colorado.** We currently have offices in Colorado Springs, Centennial, and Loveland. We are experiencing growth in all three offices and we are looking for Materials Testing Technicians. This is a full-time position with competitive wages.

### General Requirements are as follows:

- Willing to work a flexible schedule, including overtime, evenings, and/or weekends.
- Must have a good driving record as many positions include travel and driving a company vehicle.
- Valid driver's license
- Ability to work independently with a stakeholder mentality, which requires self-motivation and self-direction
- Performing field and laboratory tests for concrete, soils and asphalt

Education/ Certifications: Preferred but not required

- WAQTC • ACI Certified Field I Testing Technician • ACI Strength Testing • Hazmat Safety • Nuke Gauge Safety

Skills & Responsibilities needed:

- Ability to read and understand data and document collected information.
- Must have professional communication skills.

This position requires working in the field and testing in the lab. Successful candidates will be performing field and laboratory tests for concrete, soils and asphalt.

Experience in construction materials testing and documentation, laboratory testing, or individuals with engineering degrees in civil or geotechnical fields is a plus.

In addition to competitive pay we offer:

- Company vehicle for field work
- Health, Dental and vision insurance
- Term life and AD&D insurance
- Short term disability
- 401k plan
- Personal leave time
- Holiday Pay
