

We are a national emergency response restoration and general contractor specializing in the return of compromised property to its pre-loss condition. We work with our clients to restore their properties. Our team restores commercial, multifamily, hospitality, and educational properties from water damages, floods, fire, smoke, and natural disasters.

POSITION PURPOSE:

A DAY IN THE LIFE AS AN FIELD TECHNICIAN

As the Field Technician, I will provide emergency restoration and disaster recovery services to residential and commercial clients. Due to the nature of the work, the job sites will often be dirty, possibly cold or wet, and sometimes unsanitary. Because this is a 24-hour 365-day industry I am available for emergency work after hours and on weekends including on-call shifts and I am willing to travel locally, regionally, or nationally as business needs dictate. I am willing to pass a "fit test" for proper fit of respirator (which could involve the shaving of facial hair) because all technician's attire must meet OSHA requirements for the specific job sites.

I will provide physical labor at building, construction projects, and demolition sites, and provide water, fire, mold remediation processes, and potential biohazard projects. I provide Set up of equipment for drying structures, load and unload building materials, machinery, and tools, clean and prepare job sites while maintaining a safe environment, and complete crew sheets for the daily work performed in the absence of a Lead Field Tech. I will also provide vehicle maintenance - cleaned, stocked, and ready for response, oversee labor sub-contractors on the job site and work to be completed, and stay flexible to assist the team when needed on all service lines.

QUALIFICATIONS:

- Valid driver's license
- Must pass DOT physical requirements
- May be required to have DOT certification to operate certain vehicles
- Restoration experience is preferred but will train

SPECIAL POSITION REQUIREMENTS:

- Must be available for emergency work after hours and on weekends including on-call shifts
- Must be willing to travel locally, regionally, or nationally as business needs dictate
- Due to the nature of the work, often the job sites will be dirty, possibly cold or wet, and sometimes unsanitary. Every effort is made to protect our employees through the use of Personal Protection Equipment (PPE) and other safety precautions.
- Must pass a "fit test" for proper fit of respirator (could involve shaving of facial hair)
- All technician attire must meet OSHA requirements for the specific Jobsite
- The technician should wear company-approved attire
- Ability to lift, carry, push, and pull at least 50 lbs.
- Requires bending, squatting, crawling, climbing, reaching, kneeling

Do you have an entrepreneurial spirit? Are you self-motivated and persistent? Do you have strong professional relationship-building skills? Can you provide great customer service? If so, you may be perfect for this position!
